Tech Meetups or Conferences.

SKILLS

React JS
PHP
Laravel
Inertia JS
React Native

PROJECT-1

React-Laravel E-Commerce Website

- Beautiful features
- Designed an ecommerce website using a variety of technologies and tools to enable online purchases of products.
- Created wireframes and prototypes to illustrate the website's layout and functionality
- Utilized Laravel & React with Inertia to develop the website.

- GitHub Link -**https://github.com/DevYANahid/ca_firm_hr.git**(Private)

PROJECT-3

Inventory Management System

- Designed and implemented an Inventory Management System to streamline stock tracking, order management, and supplier coordination. Key features include:
  - Real-time inventory updates and low-stock notifications, ensuring efficient resource utilization.
  - Seamless integration of purchase order management and sales tracking to minimize manual effort.
  - Developed custom modules for inventory forecasting and batch tracking, enhancing operational decision-making.
  - Utilized Laravel to deliver a highly responsive and intuitive user experience optimized for both desktop and mobile platforms.
